### Description

## **Description:**

When students attempt to interact with the Calendar feature:

- 1. Clicking on a lesson with status Published (P) or Started (S) does not open the expected course detail pop-up window.
- 2. Clicking on a lesson that has **not started yet** (i.e., status  $\neq$  S) shows an incorrect message:
  - "Only moderators can create course event."
  - instead of the expected message:
  - "Meeting has not yet started."

## Steps to Reproduce:

## Scenario A – Accessing a course with status P or S:

- 1. Login with valid student credentials.
- 2. Navigate to the Calendar tab.
- 3. Click on a course labeled as Published (P) or Started (S).
- 4. Observe that the course details pop-up does not open.

#### Scenario B - Clicking a course that hasn't started:

- 1. Login with valid student credentials.
- 2. Navigate to the Calendar tab.
- 3. Click on a course that has not started yet.
- 4. Observe the error message displayed.

## Expected Result:

- For Scenario A: A course detail pop-up should appear with tabs: Information, Topic, Attachments, Recent Events.
- For Scenario B: A message should appear:
  - "Meeting has not yet started,"

along with relevant course details (e.g., name, teacher, date & time).

# X Actual Result:

- For Scenario A: No pop-up is triggered; course details are inaccessible.
- For Scenario B: Instead of the correct message, the system displays:
  - "Only moderators can create course event."

High – Functionality is broken for all users; core learning flow is interrupted.

# Priority:

Critical (P1) - Needs immediate resolution as it blocks key features of the Calendar system required by both US-023 and US-024.
